Letter of Use / Letter of Intent Examples

EXAMPLE A – COMMERCIAL PROPERTY:

Description of work: The proposed tenant space was CO'd as a Retail tenant space for Super Fashion (M use), occupying the entire 5,000 sf of the building according to the CO. However, there were two business offices tenants occupying this space (B use), which now is vacant. This application is to section the existing 5,000 sf (as CO'd) into 2 spaces. We will take 800 sf for the proposed JavaHouse (B use). We are changing the interior layout and proposing 2 new accessible toilet rooms. An existing mechanical system will be kept and modified accordingly for the new use. No cooking equipment as part of this renovation. See parking calculations for this Change of Use/Occupancy (from Retail M to small food establishment B use). The overall building footprint will not increase. Other spaces applications to be filed separately.

EXAMPLE B – INDUSTRIAL PROPERTY:

Description of work: The existing industrial building unit 3 is currently occupied by Five Stars industries which occupies 10,000 sf feet of warehousing and industrial space, S-2 and F-2 as per the Certificate of Occupancy. The new tenant ABC Corporation is taking this space and will convert it into a mix use of office, warehouse of supplies; such as paper, furniture and paint products and a small shop for some furniture maintenance. The change of occupancy from S-2, F-2 to B, S-1 and F-1 triggers an intensification in the number of parking spots which has been calculated according to the site plan and the table below. We have contacted the Department of Health Services for the density increase (exceeding 15% of the allowable office area of the building). We are installing two new RTU's and replacing half of the existing lighting system. See the attached tenant key plan for the rest of the building.
